Swordfish! Play as this masterpiece of nature in Pixel Mestic io and sleash fencer in you! Offers crisp gameplay, different game modes and tone unlock it for free The game will chain you to the table as you taste the glory of being literally king of the sword. The game Pixel Swordfish ioYou can play like a pixelated swordfish (the surprise of earth-breaking) that expires to become king of swords. And your goal is to climb the ranks with as high as possible. You start out like a cute little creature that barely resembles a sword. At first you will start with a very short account, perhaps worth it to be called daggerfish instead of swordfish. When you pop pointless balloons, your account will grow in length. Swordsmen die by stabbing their colleagues' accounts. Therefore, the length of your account is a key means that will help you defeat your enemies. This opens the door to different tactics and strategies that you can use to gain an advantage. For example, you can round around a player with a shorter bill and charge inwards when you're like in such a way that your prey will get first. Personally, I managed to reach 17 killed down with this and camping at the bottom of the map where the balloons appear. Unfortunately, the swordfish was stabbed in the back while I was busy with a screenshot to demand my bragging rights. The lure of the game's solicity can attract players of all ages. Because there is no chat system in the game, children are safe from the toxicity that plagues most online games. Different game modes There are different modes of multiplayer games in the game, including classic, survival, and group game. Although, I couldn't play other ways because requiring high trophies counting these game modes are enough reasons for me to install Pixel Swordfish for PC. Classic mode is similar to single-player mode, where your goal is to score as many points as possible. The higher your score, the more trophies you take home. On the other hand, the survival mode has an unheary touch of modern Battle Royale games. So the map will shrink, and you'll be forced to move closer to the center, forcing you to get caught up in the rift of the 50-player free-for-all battle. Team mode allows 2-4 teams to fight. In this mode, you will feel like part of the 3+11 Musketeers when your 14th team of players clashes with other teams. And every time a player dies from your team, you lose 1 source. You lose everything and your team will be removed! I'm sure that, regardless of the age of simple gameplay and the surprising amount of unlocking, you're a long time away. So download and install Pixel Swordfish for PC now! Then try some more Arcade Games that will keep pumping blood like Rise Up and Football Star – Super Striker! 1.90 October 14, 2015 2020 Minor error fixes and improvements 1.88 July 17, 2020 Minor bug fixs and improvements 1.87 April 24, 2020 Minor bug fixs and improvements 1.85 August 8, 2019 Minor bug fixs and improvements 1.85 July 29, 2019 Minor bug fixs and improvements 1.84 June 2019 Minor Error Fixes and Improvements June 1.84, 2019 Minor Error Fixes and Improvements 1.84 June 7, 2019 Minor error fixes and improvements 1.84 June 7, 2019 Minor bug fixs and improvements 1.84 June 7, 2019 Minor bug fixs and improvements 1.84 June 7, 2019 Minor bug fixs and improvements 1.84 June 7, 2019 Minor bug fixs and improvements 1.84 June 7, 2019 Minor Error Fixes and Improvements April 1.83, 2019 Minor Error Fixes and Improvements April 1.8, 2019 Minor Error Fixes and Improvements April 1.8, 2019 Minor Error Fixes and Improvements 1.79 On March 12, 2019 Our Beloved Players!
